

Aerospace Quality Management

AS9100

On the safe side.

Companies in the aerospace industry must meet particularly high demands concerning the quality and documentation of their processes. A DEKRA certification in accordance with the AS9100 standard clearly demonstrates your organization's capabilities to your customers and business partners. At the same time, it provides an indispensable ticket to the global market.

What AS9100 stands for

The AS9100 ff series was developed by the International Aerospace Quality Group (IAQG) on the basis of ISO 9001. It is applied worldwide by all leading companies in the aerospace industry as a quality standard for their suppliers. AS9100 is identical in content to the European standard EN 9100 and the Asian standard JISQ 9100. The aim of this international standard is to ensure maximum efficiency and reliability for processes within the supply chain and thus to prevent risks.

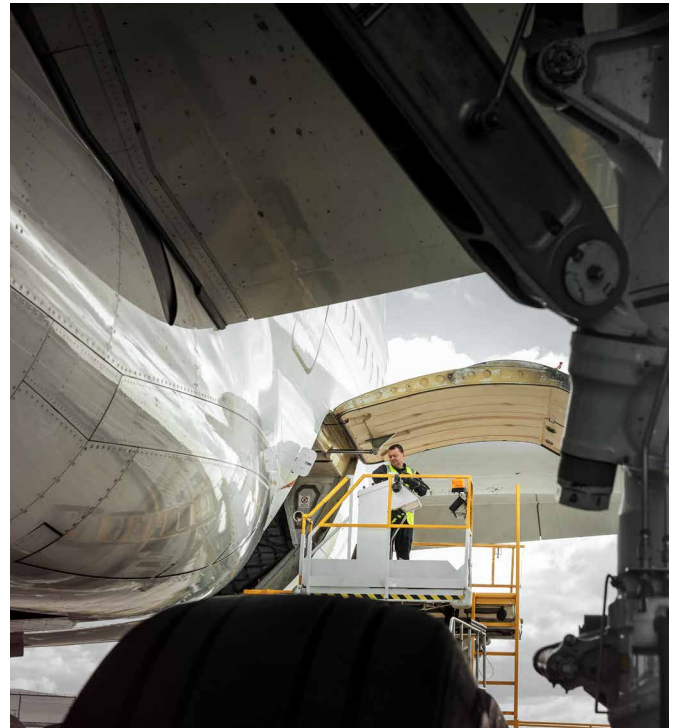

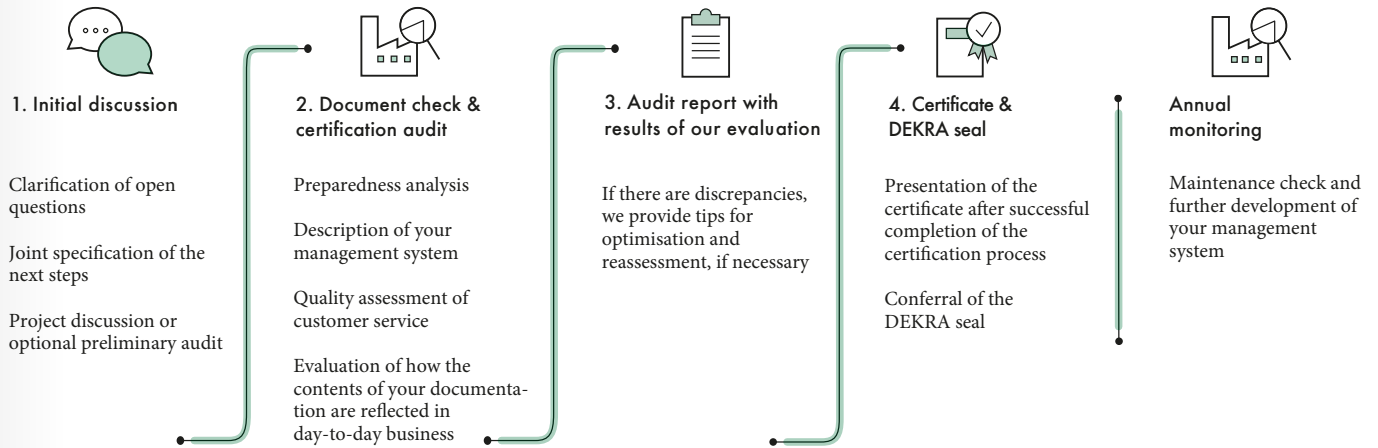

The series of standards includes not only a set of rules for design, development, production, assembly and maintenance (AS9100), but also for maintenance organizations (AS9110) and for dealers and distributors (AS9120).

What DEKRA offers

Consistent quality management according to AS9100 helps you to improve your processes sustainably, reduce costs, remedy weaknesses and increase your competitiveness. Certification by DEKRA brings you additional advantages:

- **Global market access:** recognition by all relevant market players
- **Registration as a supplier with access rights to the OASIS database (Online Aerospace Supplier Information System) available worldwide**
- **Active risk management:** reduction of warranty risks
- **Easy integration with other management systems**
- **Flexible certification procedure:** we adapt to your needs

AS9100 certification process

Complementary services

You can also benefit from DEKRA Certification for other areas and systems, such as [ISO 9001](#), [ISO 14001](#) or [ISO 45001](#). We are internationally accredited for more than 40 standards - and are happy to help you combine the desired certifications with little effort.

As a partner to the aerospace industry, the DEKRA Group offers numerous other services:

- **Sustainability management, e.g. setting up management systems**
- **Energy efficiency, e.g. consumption classification**
- **Training and education, e.g. training as an aviation security assistant**
- **Personal certifications, e.g. as a data protection specialist**

The DEKRA seal of excellence

Signaling maximum quality and reliability across different industries and around the globe, the DEKRA seal is a hallmark of quality and a valuable marketing instrument that sets you apart from the competition. Use it to show your customers and business partners the value of what you offer. We are here to help you.
